2019 INTERNATIONAL CONGRESS OF THE CATALAN SOCIETY FOR ANGIOLOGY, VASCULAR AND ENDOVASCULAR SURGERY

The 2019 International Congress of the Catalan Society for Angiology, Vascular and Endovascular Surgery (SCACVE) will be May 10-11, 2019, at MiM Sitges Hotel, few kilometers south from Barcelona (Spain).

It is a scientific event whose main objective is to provide a platform for education of vascular surgeons and trainees. The congress has three aspects: first, to present and discuss advances and scientific research in angiology, vascular and endovascular surgery. Second, to provide an open espace for discussion of clinical cases with reknown experts. And third, to bring people together for close partnership, to exchange experiences and to establish scientific cooperations.

Abstracts are one of the main foundations of the scientific program, with abstract submission open from March 1 to April 15, 2019. A panel of international and local experts have already committed themselves to actively participate in the discussion of both abstracts and clinical cases. However, we rely on the most meaningful participation of many attendees to make our congress another milestone among vascular surgical meetings in Europe.
